ASSEMBLY GUIDE

3

Fog lights and a support bar are fitted to the front bumper skirt.

YOUR MODEL

You will be building a 1:8 scale replica of a customised 1973 Ford Falcon XB GT. Features include a lift-up bonnet that reveals a detailed engine, opening doors, wind-down windows and an 'active' steering wheel. A remote-control fob illuminates the main lights, brake lights and indicators.

Scale: 1:8
Length: 62cm
Width: 25cm
Height: 19cm
Weight: 7+kg

ALL RIGHTS RESERVED

Items may vary from those shown.
All parts belong to a kit. Collectors' item for adults. Not suitable for children under 14. Some parts may have sharp edges, please handle them with care.

The installation of electronic parts must always be carried out by an adult. When replacing batteries, use the same type of batteries. Please ensure that the battery compartment is securely fastened before you use the model again. Used batteries should be recycled. Please make sure to check with your local council how batteries should be disposed of in your area. Batteries can present a choking danger to small children and may cause serious harm if ingested. Do not leave them lying around and keep any spare batteries locked away at all times.

The editor's policy is to use papers that are natural, renewable and recyclable products and made from wood grown in sustainable forests. The logging and manufacturing processes are expected to conform to the environmental regulations of the country of origin.

In the event of a significant increase in production and transport costs, the publisher reserves the right to modify its selling prices.

Stage 91: Fog Lights

A support bar and fog lights are fitted to the front bumper skirt.

List of parts:

- 91A** Fog light reflector (left)
- 91B** Fog light reflector (right)
- 91C** Front bumper skirt support bar
- 91D** Fog light and cable (labelled 3)
- 91E** Fog light and cable (labelled 4)
- 91F** Fog light lens (left)
- 91G** Fog light lens (right)
- DS02** Four* 2.4 x 4mm PM screws
- PS05** Three* 2.3 x 4mm PB screws

* Including spare
 PM = Pan head for metal
 PB = Pan head for plastic

Area of assembly

Stage 91: Fog Lights

STEP 1

Take the left fog light reflector **91A** and the left lens **91F**. Note that the pegs on the lens are different sizes. Fit the parts together, pushing the lens firmly home. No glue needed.

STEP 2

Repeat the process to fit the right reflector **91B** and lens **91G** together.

STEP 3

Take the left fog light **91A/F** (check that it is labelled L) and fit it into the rectangular hole in the bottom corner of the skirt **90A**, on the left side when viewed from the driver's position. The opening in part **90A** is labelled L on the inside.

STEP 4

Turn the assembly over and fix the fog light in place from inside the skirt **90A** using a **PS05** screw.

STEP 5

Similarly, fit the right fog light **91B/G** (labelled R) in place at the other end of the front bumper skirt **90A**, and fix in place with a **PS05** screw.

Stage 91: Fog Lights

STEP 6

Take the front skirt support bar **91C** and position it across the inside of the front skirt **90A**. Three screw holes in part **91C** fit over raised screw sockets in part **90A**. They are positioned so that the bar will only fit one way round.

STEP 7

Fix the support **91C** in place with three **DS02** screws.

STEP 8

Take the cable **91D**, labelled 03, and fit the LED into the socket in the back of the left-hand fog light. There is a label L on the inside of part **90A**, above the fog light.

STEP 9

Fit the LED on the end of the cable **91E**, labelled 04, into the back of the right-hand fog light, with the label R on the inside of part **90A**, above the fog light.

COMPLETED ASSEMBLY

Fog lights, with cables, and a support bar have been fitted to the front bumper skirt.

COMING IN ISSUE 92

• ASSEMBLY GUIDE

The right headlight is assembled and fitted to the front skirt assembly.

NEW PARTS

Right headlight housing, outer lens, reflector holder, reflector and lens, LED and cable plus assorted screws.
